

FDTH7250D

56cm Ceramic Tower Heater

The Frigidaire Ceramic Tower Heater, standing at 56cm, is a stylish yet functional device for your home. With 2 heat settings (1000/2000W) and a PTC Ceramic heating element, it delivers tailored warmth efficiently. The easy-to-use remote control and touch panel, coupled with an LCD display, make operation simple. Safety is paramount with features such as overheat protection and a tip-over switch. The oscillation function ensures even heat distribution, while the temperature can be set between 15-45°C for your comfort. The heater optimizes energy usage, and its compact size allows for easy placement in any room.
