

FDTH8010D

66cm Ceramic Tower Heater

Discover the Frigidaire Ceramic Tower Heater, a perfect blend of style and functionality. Equipped with 2 heating power settings (800/2000W), it provides warmth tailored to your needs. Its touch LED display and remote control make operation a breeze. Packed with safety features like thermal cut-off, overheat protection, and a tip-over switch, this heater is as safe as it is efficient. The temperature ranges from 15-45°C, and the oscillation function ensures even heat distribution. Its unique flame effect adds aesthetic appeal, while the ECO function optimizes energy use. Compact in size, it fits perfectly in any room.
